Commissioner Bob Stump
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Stump,

I am writing to urge you to protect solar rights in Arizona.

With more than 300 days of sunshine each year, Arizona should be a leader in solar energy. An important component of this solar energy is distributed generation -- systems installed on consumers' homes and businesses. Distributed generation not only assists consumers by powering their energy needs with clean, renewable energy, but any excess energy can also be sent back into the grid, reducing the need for the utility company to produce extra energy while benefiting other customers.

Net metering is one of the most important issues with regards to distributed generation. Net metering ensures that solar customers get fair credit for any energy that is sent back into the grid from their systems. It would not be fair, and it doesn't make sense, not to pay these generators the fair market value for the energy they generate.

A recent study found that because of net metering, APS customers alone will receive \$34 million in grid benefits each year, starting in 2015.

These benefits range from delaying the need for additional grid infrastructure and power plants, which saves a substantial amount of money, as well as reducing pollution and the associated impacts on public health and the environment.

Solar is a win-win for Arizona, and net metering is an important part of that. Please stand up for Arizona's solar rights by protecting and promoting net metering.

Thank you for considering my comments.

Sincerely,

Ms. Suzy Mound

Subject: Consumer comments in support of APS's Energy Efficiency Programs and Program Budgets (Docket No. E-01345A-12-0224)

Jun 30, 2013

Commissioner Bob Stump
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Stump,

I am writing to express my support for the energy efficiency programs and measures in APS's proposed plan and also my strong support for Arizona's Energy Efficiency Standard.

The Energy Efficiency Standard and these programs will help save customers money, plus reduce environmental and health impacts by saving energy and reducing water use and pollution. Energy efficiency is a critical component of moving toward a truly sustainable energy system.

The programs in the plan will help the company meet its responsibilities under the Energy Efficiency Standard, as well, achieving savings for retail sales.

Energy savings will be realized by APS customers for existing homes via the Home Performance with ENERGY STAR program, plus will provide flexibility and promote greater innovation and creativity. Renters will benefit and have more opportunities to save via that proposed modifications and additions to the Multi-Family Energy Efficiency Program, plus there is an incentive for improved efficiency for those who construct multi-family dwellings.

The programs that target non-residential customers, including LED lighting measures and energy management systems, will give businesses and schools more opportunities to conserve energy, as well.

Finally, I strongly support APS maintaining a commitment to low-income programs, which help individuals and families who are struggling the most.

In summary, I ask that you approve a strong EE Implementation Plan for APS, that you maintain the commitment to EE programs, and that you adopt a plan that demonstrates that APS can meet its commitments/requirements under Arizona's Energy Efficiency Standard.

Thank you for considering my comments.

Sincerely,

Dr. Terry Colver

Subject: Comments regarding Tusayan Venture's CC&N application, Docket
#W-20828A-11-0475

Jun 14, 2013

Commissioner Bob Stump
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Stump,

I am submitting these comments on the Application for Certificate of Convenience and Necessity (CC&N) for Tusayan Ventures, L.L.C. I am very concerned about this proposed development and urge you to deny the CC&N.

Tusayan Ventures' proposed development could have far-reaching and significant negative impacts on public lands, including areas within Grand Canyon National Park. The groundwater below Tusayan is connected to seeps and springs in Grand Canyon and on Havasupai lands.

Information from the National Park Service indicates that pumping groundwater in this area could reduce water to these springs or cause them to dry up. The water in the Canyon's springs support a diversity of life and is the lifeblood for the Havasupai community. Allowing this project to move forward and granting this CC&N is completely unacceptable; the Corporation Commission should not permit such a project.

Even though it has been almost a year since the company applied for a CC&N for permission to establish a water deliver system, Tusayan Ventures still has not met the requirements of the permit. It has not revealed where the water will come from, nor how much wastewater would be generated and how it would be handled. The questions are many and the answers nonexistent. Please reject this proposed CC&N.

Thank you for considering my comments.

Sincerely,

Mr. Cody Goodell
